## Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

minutes

A Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

## Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

PROBLEM

The sensor initially senses the smoke, flame or gas and the fire using the technology that we designed.

Key rules of brainstorming

To run an smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

## Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

| HARIKARAN S | HARIHARAN R | KARUPPANNAN R M | INDRAJITH CH |
|---|---|---|---|

## Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

The reporting should be made on time

The fire should be sensed on time

The fire control should be proper at all the time

The IOT components should accomodate the step by step process without any kind of delay

## Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

The flame sensor, smoke sensor should operate

Modern technology along with Artificial Intelligence should be accessed

The reporting alarm should be done at proper time

The access should be easy

Importance

If each of these tasks could get done without any limits, which would have the most positive impact?

Feasibility

## After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

A **Share the mural**
**Share a view link** to the mural with stakeholders to keep them in the loop about the outcomes of the session.

B **Export the mural**

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

**Strategy blueprint**
Define the components of a new idea or strategy.
